

# SUSTAINABLE GROWTH THROUGH THE WORLD'S LEADING BRANDS

## Investment Strategy

The Brand Capital Fund (BCF) invests in high-quality global companies with strong, enduring brand capital and sustainable success in compounding shareholder wealth through most market regimes. Our strategy aims to maximise total return in the long term with substantially lower drawdowns than developed global equity markets. We create and manage the long-only portfolio using an approach that is fundamental yet systematic.

Our investment process incorporates systematic capture and transformation of fundamental company and sector data to optimise the global opportunity set for investing in Quality. We then employ a quantitative, multi-factor-volatility-based process to construct and manage a risk-minimised portfolio to deliver more stable returns.

The Fund aims to avoid controversial investments by applying Responsible Investment criteria. We employ a company exclusion list, as published quarterly by the Norwegian Government Pension Fund – the leading, \$1trn sovereign wealth fund, which has adopted the United Nations Principles for Responsible Investing (UN-PRI).

## Net Returns
